

Obtaining a Compiler License

from STW Technic

Introduction

All STW Technic Controller Modules require the use of the HighTec Compiler. In this document, we will go through the following items:

1. The different types of HighTec Compiler licenses.
2. The process to purchase and download a compiler license for your STW Technic Controller Module.
3. Evaluation option for Node-Locked License.

Types of Compiler Licenses

The HighTec Compiler has the following licensing options:

Node-Locked (PN 75588)

Limited to a single machine, assigned by MAC Address.

Network (PN 75589)

Allows multiple computers to access from a central internal network location, but **limited in usage to only a single machine at a time**. Assigned to server MAC Address.

Network with Roaming (PN 76253)

Same as a Network license, but can be used **temporarily** outside of an internal network, still **limited to a single machine at a time**. Assigned to server MAC Address.

Purchasing a Compiler License from STW Technic

Once you have chosen the right compiler license that fits your needs, please proceed with the following:

- ❶ Provide your STW Technic sales representative with the part number and quantity you would like to purchase according to the types detailed above:
 - **PN 75588** : Node-Locked License
 - **PN 75589** : Network License
 - **PN 76253** : Roaming License (Outside internal network)
- ❷ Provide the following information to your STW Technic sales representative:
 - **Company Name**
 - **Email Address** - Used for account creation. If a Node-Locked license, please provide a personal address. All other licenses may use a general company email address.)
 - **MAC Address** - Of the computer/server that is going to utilize the license.
 - **Computer/Server Host Name** - Used for Network License.
- ❸ Once all information and license type/quantities have been ordered, STW Technic will receive a notification email from HighTec that your designated license files are ready. Your STW Technic sales representative will provide installation instructions and links to download the HighTec Compiler and license files.

❗ **Please Note** – HighTec Compiler licenses are independent of STW Technic, and thus, the terms of compiler licenses are managed by HighTec. This is an industry-wide standard in our market for Infineon based processors.

Evaluation Option for Node-Locked License

For the Node-Locked license type, there is an option to obtain an evaluation license free of charge for 30 days. Follow the instructions below to download and obtain a Node-Locked license key for evaluation purposes.

Obtaining an Evaluation License

1. Register for an evaluation key using this website form: <https://hightec-rt.com/en/support/license/evaluation.html>
2. Once your registration is approved by HighTec, you will receive a notification via email with the license files for you to download.

 **Please Note** — HighTec is located in Germany, so it may take up to 24hrs following to receive the email notification.

 **Please Note** — Please contact your **STW Technic Sales Engineer** or support@stw-technic.com once you have received your compiler license download files for next steps.
